TMS (Transportation Management Software)

Transportation Management Software (TMS) is a crucial tool for companies seeking to optimize their logistics and supply chain operations. It helps businesses plan, execute, and monitor the movement of goods, whether by road, rail, sea, or air. TMS streamlines various processes, including route planning, carrier selection, freight auditing, and shipment tracking. By automating these tasks, it reduces costs, enhances efficiency, and improves customer satisfaction. The software also provides valuable insights through analytics, allowing companies to identify performance trends, optimize delivery schedules, and manage inventory more effectively. With features such as real-time tracking, compliance management, and integration with other enterprise systems, TMS is essential for businesses looking to improve their transportation operations and maintain competitive advantages in the marketplace.

UrTruck has designed a complete TMS from it's own experience as a successful Freight Broker for many years.

This is a complete TMS for managing your Carriers, Shippers, Drivers and Loads. You can track all of the information needed in your day to day operations as a Freight Broker.

There are many feature: You can manage:

Drivers, Carriers, Shippers, Invoices, Insurance companies, Factoring Companies, Payment information, BOLs, Rate confirmations, multiple cargo types, Certification and much more. You have the ability to print numerous reports and customize to meet your individual needs.

Accounting Software

Accounting software is a digital tool designed to help businesses and individuals manage their financial transactions and streamline the accounting process. It automates tasks such as bookkeeping, invoicing, payroll, financial reporting, and tax preparation, reducing the need for manual entry and minimizing errors. Modern accounting software often integrates with other business tools, providing real-time insights into cash flow, expenses, and profits. Popular examples include QuickBooks, Xero, and FreshBooks, each offering user-friendly interfaces and cloud-based access for easy collaboration. By simplifying financial management, accounting software enhances accuracy, saves time, and supports better decision-making for businesses of all sizes.

At UrTruck Services we provide all or a portion of your accounting needs. For those of you that just need software to do it yourself we have provide several links for you to download Accounting Software.
